ALI KASSEM

Junior Software Engineer

Beirut, Lebanon (GMT+3) | Open to International Remote and Hybrid Roles | +961 71 385 617 | 3alikassem123@gmail.com
linkedin.com/in/alikassem877 | github.com/alikassem877 | alikassem877.github.io/my-portfolio

PROFESSIONAL SUMMARY

Junior Software Engineer specialising in TypeScript, Next.js and ASP.NET Core, with a strong focus on secure, well-tested backend design. Independently built and deployed a multi-tenant SaaS platform with JWT-based tenant isolation and automated integration tests, and delivered database and API features within a six-person agile team using Jira and code reviews. Seeking a remote or Beirut-based Junior Software Engineer role where I can contribute to production code from day one.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, C#, Java, SQL
Frontend	React, Next.js, Angular, HTML, CSS, Tailwind CSS
Backend	ASP.NET Core, Node.js, REST APIs, Authentication & Authorization
Data	PostgreSQL, SQL Server, Prisma, Entity Framework Core
Tools	Git, GitHub, Docker, Postman, Jira

PROFESSIONAL EXPERIENCE

Software Engineer Intern | TechTalks (Remote) Aug 2026 – Oct 2026

Baytak Care – remote property monitoring platform | Next.js, TypeScript, PostgreSQL, Prisma

- Designed and updated Prisma schemas for property, maintenance-request, and checklist data in a platform with owner/caretaker roles and approval workflows.
- Implemented owner/caretaker access controls, authentication, and backend business logic, including 7 Next.js Server Actions for maintenance-request approvals and secure caretaker invitation workflows.
- Collaborated in a six-person team using Jira, feature branches, and code reviews; authored 12 merged pull requests.

SELECTED PROJECTS

Dealer SaaS | Multi-Tenant Dealership Management Platform Aug 2026 – Present

Next.js, TypeScript, PostgreSQL, Prisma, Docker | github.com/alikassem877/dealer-saas | Live demo: dealer-saas-tau.vercel.app

- Independently built and deployed a dealership platform with 19 REST API endpoints covering vehicle, customer, lead, and sales workflows; ongoing development toward a subscription product.
- Derived tenant IDs only from authenticated JWT sessions across API routes, never client input; verified ownership on direct-ID requests and returned 404 for inaccessible records.
- Wrote 25 passing automated tests (9 integration tests exercising 11 API endpoints, plus 16 unit tests), validating list and direct-ID isolation by simulating cross-tenant access between two independent tenants.

BankSystem | Banking Backend Application In Progress

C#, ASP.NET Core, Entity Framework Core, SQL Server

- Building a layered backend (API, Application, Domain, Infrastructure) exposing 3 ASP.NET Core API endpoints, with account/transaction models and persistence.

EDUCATION

Technical License in Information Technology – Software 2023 – 2026

Al-Afaq Institutes for Information & Technology

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp (Feb 2025)
- HorizonCraft: Sailing Towards Mediterranean Expertise Building — MIDAL Organization and CCIA-BML, EU-co-funded Interreg NEXT MED capacity-building programme (Aug–Sep 2026). Covered workplace readiness, communication, problem-solving, digital collaboration, AI-assisted productivity, entrepreneurship, and business fundamentals.

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency)
